EDUCATION

2021 - Present **ISGA - Marrakech** Currently pursuing a fourth-year engineering program with a focus on AI. Developed a strong foundation in engineering principles, mathematics, programming, and problem-solving.

2021 **Lycee d'excellence 2** **Scientific Baccalaureate** Gained fundamental knowledge in mathematics, physics, and scientific disciplines, equipping me with analytical and problem-solving skills.

PROFESSIONAL EXPERIENCE

2022 **Banque Al wava Mauritanienne Islamique** **Discovery Internship** Practical experience applying theoretical knowledge, gaining deeper insight into the industry.

2023 - Present **Udemy - Coursera** **Junior Front - End Web Developer**

- Learned and practiced web development using HTML, CSS, and JavaScript.
- Contributed to web projects and honed skills under the guidance of experienced professionals.

2023 - 2024 **Attijari Bank - Mauritania** **Internship**

- Created a graphical user interface (GUI) for an internal dashboard application using HTML, CSS, and Bootstrap.
- Improved user experience and internal process efficiency by developing a simple and functional interface.
- Applied technical skills in a professional banking environment while learning security and confidentiality challenges specific to the financial sector.

2024 - 2025 **Banque Populaire Mauritanie** **Internship**

- Designed and developed a document management system for regulatory documents, enhancing efficiency in document lifecycle management.
- Implemented functionalities including document creation, version control, validation, and publication using Spring Boot (backend) and Angular (frontend).
- Utilized PostgreSQL for database management and MinIO for secure file storage.
- Gained experience in API integration, multi-layered application development, and problem-solving in a professional environment.
